Guyancourt, may 2022

**AntemetA, named Veritas EMEAI Partner of the Year**

***AntemetA announced that it was recognized as Veritas EMEAI Partner of the Year by Veritas Technologies, a leader in multi-cloud data management.***

The award recognizes top channel partners in the EMEAI region for their contributions to the Veritas business as demonstrated by overall performance in revenue growth, program adoption, excellence in technical innovation, and strategic implementation of Veritas solutions. AntemetA was recognized at Veritas’ recent annual channel conference.

“Backed by a historic strategic partnership, AntemetA has been committed for more than 20 years alongside Veritas to protecting the information assets of companies. Their expertises, combined with the continuous technological innovation of Veritas, allow them to meet the expectations and face the challenges of IT departments in terms of cyber-resilience.”

***“Our collaboration with Veritas is an operating model between partners. It is long-term with real commercial loyalty and incorporates an innovative technological component that allows us to understand the challenges and transformations in the uses of data protection.”*** Stéphane Blanc, president of AntemetA.

Veritas’ “Partner of the Year” awards are given annually to recognize top partners in its channel community. The awards were announced as part of a virtual event where Veritas outlined its key channel initiatives for the upcoming year, empowering partners to help their customers manage and protect their critical data – wherever it lives, from edge to core to cloud.

Mike Walkey, senior vice president, Global Channels & Alliances at Veritas, said: ***“Veritas’ business relies on the innovation and success of partners like AntemetA and we are honored to recognize their accomplishment. This award underscores AntemetA’s dedication to helping customers successfully manage and protect their data in today’s complex multi-cloud landscape. We look forward to a long and successful partnership.”***

#### **About AntemetA**

A French company created in 1995, AntemetA is today one of the leaders in hybrid cloud and data protection. The company supports more than 1,000 customers in the evolution of their information systems, through the implementation of infrastructure solutions (VAR), the provision of Cloud services (CSP) and expertise in managed services (MSP).

A human-sized company with nearly 300 employees, the group has 7 agencies located in France as well as a subsidiary in Morocco.

All AntemetA cloud and customer service are ISO 27001 certified, guaranteeing the security and confidentiality of hosted information. In 2022, the company obtained Health Data Hosting (HDS) certification and ISAE type 1 certification. Committed to a global approach to Corporate Social and Environmental Responsibilities, the company has notably launched a reforestation project labeled “Low carbon” intended to reduce its energy footprint.

The AntemetA group is a member of the [Hexatrust](#) association, the group of French cybersecurity and trusted cloud solutions. For more information: [www.antemeta.com](http://www.antemeta.com), [Twitter](#), [LinkedIn](#), [YouTube](#)
